DETAILED ACTION

Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: The prosthetic acetabular component comprising a metal base construct of two layers of different metals with different primary constituents snap-fit with a polyethylene bearing construct was found to be novel. The prior art did teach metal constructs joined with polyethylene bearing inserts but did not teach the combination of features including a flange that extended from the bearing wall distally that snapped into a groove formed from a rail within the metal construct component and having a two layer metal construct of different metals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
